

# The Second Study of Diarrhoea and Vomiting in the Community (Weekly Follow-up Study)

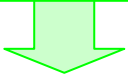

Your doctor asks if you would like to help to find out more about tummy bugs.

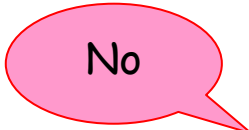

You think about this. Do you have any questions? You can talk to the nurse who works with your doctor.

Please return the reply slip

Would you like to help?  
It is up to you!

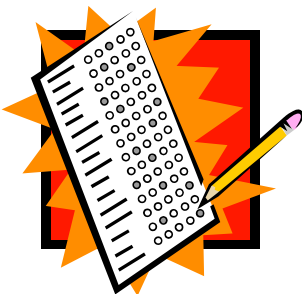

Thanks for reading this. Please return the reply slip.

Your nurse will ask your parent or guardian to sign a consent form. This tells us that you would like to help us.

You or your parent or guardian will fill in a form about your health.

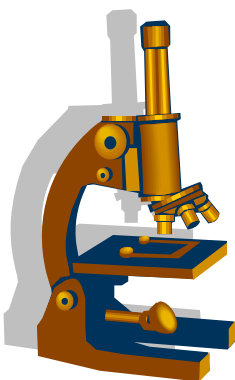

Please tell us as soon as you develop diarrhoea or vomiting (D or V) but, in case you forget, we will check with you each week for a year to see if you have been ill

If you have been ill, we will ask you to give us a sample of Faeces (poo) and fill in a form.

This will be tested and your doctor will get the results. We will contact you again the next week.

If you have not been ill, we will ask you again next week.

You can decide to stop helping us at ANY time.
